

Online Backup Program

Secure an Off-Site Backup of your Data

SOHO Solutions' Online Backup Program is the complete backup and recovery solution for small and medium businesses, as well as remote offices and sites. Combining proven disk and online technologies, our online backup services radically simplifies the protection of all your company's servers including file, database, application and Exchange servers, supplementing your on-premise tape backup systems.

Online Backup Features:

- Daily Backup job monitoring and testing by SOHO Solutions technical team
- Provides Continuous Data Protection (CDP) for up-to the minute backups
- Automatically moves data off-site to a secure facility
- Archives data with long-term history that you define
- Restores your data rapidly and completely over the Internet or from an optional local appliance
- Use of a highly secure data center at a fixed monthly cost
- Customized Backup and Retention Schedules
- Easy to use software with product enhancements and upgrades included
- A full range of services that are flexible to meet current backup requirements and scalable to meet future needs

Partner, n

Partner

An IT Partner, not just a Provider

Choosing SOHO Solutions' On-Line Backup Program will eliminate time spent managing your systems backup and the overhead used to store tapes and other backup media while providing a secure off-site location for your backups.

With this program, we can reduce the amount of time spent retrieving tapes to recover lost data by using software that can retrieve your data from the secure off-site location.

SOHO Solutions On-Line Backup program addresses your Data Backup needs by:

- Automatically backing up data to a secure off-site location
- Using software that makes it easy to restore lost data and files without using tapes on-site
- Providing a systematic method of protecting your data with a fixed monthly cost
- Using a system that is flexible and scalable to meet current and future needs
